

AMBER Alert Effects: Own-County vs Commuter-Spillover (ACS county-to-county commuting weights; state-clustered SEs; 95% CI)

$$\text{Spillover} = \sum_{j \neq c} w_{j \rightarrow c} \times \text{Alert}_{j,t}$$

where $w_{j \rightarrow c}$ = share of c 's workforce commuting from j
(ACS 2016-2020, 5-year estimates; 119k county-pair flows)

Own-county alert ($\hat{\beta}_{own}$)
Cross-county spillover ($\hat{\beta}_{spill}$)
